Time: 11:00 AM - 12:15 PM

25 MAR 2026

Max. Marks: 30

SECTION - A

Q. No.	Answer any Four of the following questions (4×5 = 20)	M	L	C
1.	Explain the following concepts of SVM in data classification 1) Support Vector 2) Hyper plane/ Hyper Line 3) Kernel 4) Soft margin 5) Hard Margin	5	L1	CO3
2.	Explain Map Reduce's the Matrix Vector Multiplication with an example.	5	L2	CO2
3.	Explain any 3 types of Regression modeling methods of Data analysis.	5	L2	CO3
4.	Explain main types/ techniques of multivariate analysis?	5	L2	CO3
5.	Explain the following Kernel methods in SVM 1) Gaussian Kernel 2) Linear kernel 3) Polynomial Kernel	5	L2	CO3

SECTION - B

Answer any One of the following questions (1×10 = 10)

6.	What is cluster analysis? Explain Different methods of Cluster analysis Techniques	10	L2	CO3
7.	Write a Short Note on Following a) Association Rule Mining b) Types of data in Cluster analysis	5 5	L2	CO3
